### **Mindgrub Technologies Moves to New Baltimore Location**

*Historic Baltimore area building offers new creative space for expanding Technology Innovation Agency.*

Mindgrub Technologies is pleased to announce that they will have a new address as of June 13, 2011. The company left their previous location at 583 Frederick Road to move only a few blocks down the road to 640 Frederick Road, a larger building that will assist the company with future growth. Mindgrub is a comprehensive Technology Innovation Agency—combining technological, strategic, and creative expertise.

The new location is a major part of the area's history as it was built in the early 1900's to house the First National Bank of Catonsville and held the largest telephone exchange in Catonsville in the 1950s. Most recently, an architectural company has been utilizing the building for their showroom and retail space.

"We've come a long way since working out of a renovated home office basement. Our client base and expertise have expanded and we have found our office space should as well," says Todd Marks, President and CEO of Mindgrub Technologies.

Because of the 177% increase in team members since 2009, and the company's lengthening client list, Mindgrub needed a larger work environment that would help the company build a more creative and collaborative atmosphere for its team members. One of the exciting assets of the new space will be a relaxing area for employees to take a break from a challenging project. This encourages the Mindgrub team to think creatively not only while working, but during down time as well.

Mindgrub Technologies' Address:  
640 Frederick Road  
Baltimore, MD, 21228

###

#### About Mindgrub Technologies, LLC

Mindgrub specializes in the strategic development of technology and services to meet the evolving marketing and information delivery means of Fortune 500, Government and Education institutions. We create applications for the web, social media, and mobile technology. We utilize Flash, Drupal, and other software platforms to develop social media tools and campaigns. We have unique frameworks for the iPhone, Android and Blackberry mobile operating systems. Mindgrub knows, and is a leader in, how to keep users of new technology engaged and accessing information in creative and innovative ways.
